

Primary lining using steelback and modular elements 11

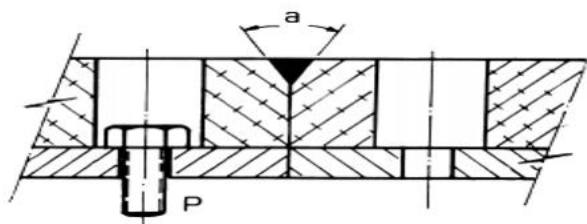

MHP STEELBACK

Steelback offers a rapid method of fitting heavy-duty linings from 15 mm to 140 mm thick, with extreme impact resistance, without bonding, or on impact damaged chutes. The hot vulcanised bond is virtually indestructible and a further guarantee of trouble free performance for the life of the product.

In heavy wear areas mechanically fastened steelback panels offer much quicker and easier maintenance as there is no stripping of bonded linings.

MHP is one of the few suppliers equipped with portable stud-welding machinery which allows mechanical fixing without disturbing the wearing surface of the rubber.

Easy fixing with bolts or welded studs

Standard sizes from stock.

- 15+3 mm
- 25+5 mm
- 35+5 mm
- 50+5 mm
- 72+8 mm
- 92+8 mm
- 112+8 mm
- 132+8 mm

We can offer heavier specifications upon request.
